IT MAY BE TIME FOR YOUR BUSINESS TO REPORT ON CARBON EMISSIONS

Measure | Analyse | Reduce | Offset

with CarbonView

Measure your Carbon Footprint with Confidence

Businesses are now required to report on their energy and carbon usage as part of corporate governance regulations. Other than their own investor relations and internal policies, some businesses must include carbon performance in their Directors' Report. This is all part of a government initiative to help the UK navigate the transition to a sustainable, low carbon economy. As a minimum, energy use from electricity, gas and transport fuel – as well as the associated GHG emissions – must be reported.

KEY FEATURES OF CARBONVIEW

☑ **CAPTURE CARBON DATA EFFICIENTLY**

Integrate with existing systems to measure carbon emissions in accordance with global standards.

☑ **REPORT & DISCLOSE CARBON EMISSIONS**

Meet government regulations by generating dynamic and interactive reports.

☑ **MANAGE PERFORMANCE**

Track energy efficiency projects and carbon reduction against targets.

ARE YOU REQUIRED TO REPORT?

The new regulations will require up to 12,000 companies in the UK to disclose their energy and carbon emissions.

A company must report if they meet at least two of the following three criteria in a reporting year:

- **Turnover** > £36million
- **Balance sheet** > £18million
- **Employees** > 250

WE'D LOVE TO HEAR FROM YOU
